Food supplement with probiotics and oligosaccharides

Lemon taste [1]

Microencapsulated [2]

Bifidobacteria [3]

Oligosaccharides [4]

Lactobacilli [5]

4Life Tri-Factor® Formula [6]

PRE/O™

PROBIOTICS AND OLIGOSACCHARIDES

(1) Natural lemon flavouring.
(2) It does not require refrigeration.
(3) *Bifidobacterium longum subsp. infantis, Bifidobacterium longum and Bifidobacterium animalis subsp. lactis.*
(4) Galactooligosaccharides and fructooligosaccharides.
(5) *Lactobacillus rhamnosus and Lactobacillus acidophilus*
(6) Made with colostrum and egg yolk.

Did you know that...?

Millions of microorganisms live in our body, distributed throughout our skin and mucous membranes.
These microorganisms (microbiota) live in different areas and have beneficial activities, such as optimizing the use of nutrients, generating some vitamins, and protecting ourselves.

Probiotics are “live microorganisms that offer health benefits to the host, when administered in adequate amounts.”[1]

Oligosaccharides are “ingredients that produce a selective stimulation of the growth and/or activity of species of microorganisms in the gut microbiota, providing health benefits to the host.”[2]

Probiotics and oligosaccharides work very well synergically

Our current lifestyle —involving an excess of processed foods, low fiber intake, antibiotic treatments, etc.— result in a low quality and quantity of our microbiota (i.e. a bacterial imbalance), which can affect our general wellbeing.

What does PRE/O offer?

Each packet contains **875 million** colony-forming units from 5 different probiotics. It contains **2 types of oligosaccharides and corn fiber.** Thanks to our **microencapsulated technology**, it does not require refrigeration and allows live cultures to be optimally released into the colon to perform their functions. 100 mg of **4Life Tri-Factor® Formula** per packet. Easy to carry, share, and **ready to take**. Pleasant lemon taste.
